# Keep cool when the network is in demand

Energex's Positive Payback program rewards households and businesses who install PeakSmart air-conditioning, helping reduce energy during peak periods.

It's as simple as connecting an additional device (signal receiver) to your air-conditioner during the installation. This signal receiver will be activated on a few days a year during high energy demand. When activated, your air-conditioner's energy consumption will be capped for a short period, similar to economy mode. The best part is you won't have to do anything and won't notice a difference to your comfort.

## How to apply...

- 1 Buy a PeakSmart air-conditioner**  
All major brands are PeakSmart enabled. A complete list is available at [energex.com.au/positivepayback](http://energex.com.au/positivepayback)
- 2 Get a signal receiver**  
Ask your retailer or installer to supply you with a signal receiver.
- 3 Install**  
Have your air-conditioner and signal receiver installed at the same time. Make sure your installer completes the Installation Form enclosed in the signal receiver pack.
- 4 Apply for your reward**  
Go to [energex.com.au/positivepayback](http://energex.com.au/positivepayback)  
Have your Installation Form, air-conditioner receipt and bank details to apply.
- 5 Receive your reward**  
Once approved, your reward will be deposited into your nominated bank account by Electronic Funds Transfer (EFT) within 28 days.
